PEACOCKS

FANCY FEATHERS

A group of peafowl is called an ostentation, because the look of male peacocks is quite ostentatious! Peacocks use bright coloring and tail displays to impress peahens, or female peafowl.

Peafowl are usually found on the ground, but they actually can fly! Their long tails aren't well adapted to soaring, so peafowl usually only fly up into tree branches to sleep at night.

Color in the numbers using the color key!
