ANDEAN BEAR

FANTASTIC FRUITS

Andean bears are the only bears that can be found in South America. They are sometimes known as "spectacled" bears because the markings on their faces look like they are wearing glasses. These bears eat mostly plants, and they love to eat fruit. This helps plants because Andean bears will spread the fruit seeds wherever they go, making them nature's gardeners.

Unscramble the letters to learn the different fruits an andean bear might eat!
