# ARMADILLO

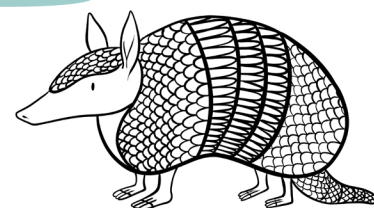

## EXCELLENT EXTERIORS

Armadillo means “little armored one” and anyone who has seen the dwarf screaming hairy armadillo that calls Reid Park Zoo home would agree. But not all armadillos are small; the giant armadillo of South America can be over 5 feet tall when standing on its hind legs. No matter their size, all armadillos have sharp claws for unearthing insects to eat and digging burrows for shelter, which other animals will then use for their own homes.
