# CHUCKWALLA

## DESERT DINNERS

Chuckwallas are native lizards, so they live in the Tucson area. They are so good at living in the desert that they don't even need to drink water! Chuckwallas get all of the water they need from the desert plants they eat, like creosote. They also love to eat flowers and fruits when they find them.

**Lead the  
chuckwalla to  
the cactus!**
