

HUMMINGBIRD COLORING PAGE

Migratory Bird Day May 9th

Have you ever noticed that sometimes you see different birds at different times of the year? Many birds migrate, or move from one place to another, during certain times of the year. Arizona is one of the best places in the United States to find migrating birds, such as hummingbirds. There are 13 species, or types, of hummingbirds that can be found in Arizona. You can help provide important food and shelter for all birds living in or passing through Arizona by planting native plants in your yard or on your balcony.
