We're bringing the

ZOO TO YOU!

.....

COCKATOO

BRIGHT BIRDS

Cockatoos have unique feathers at the top of their head, which form a “crest.” The crest is used to communicate — raised crests indicate excitement or a bird on alert; relaxed crest feathers are displayed when a cockatoo is resting or eating. Zoo Keepers can interpret the cockatoo’s behavior at Reid Park Zoo by looking at their crest display!

**Connect the dots
and color in the
cockatoo’s crest!**
